

Does your face and neck need a lift? Ask about the *Contour Ultra*'s nonsurgical, painfree, muscle toning treatment.

Don't give in to the effects of gravity! Fight Back! Give your face and neck muscles a series of exercise workouts.

Q How does the Contour Ultra work?

A Unlike the rest of our body, we have no effective means of giving our face and neck a work out. The Contour Ultra delivers a twenty minute muscle exercise to various muscles of your face and neck. It uses a painless "microcurrent" to stimulate and exercise the muscles.

Q How long does a treatment last?

A A treatment is 30 to 45 minutes. Typically the time will be divided between the automatic 16 pad protocol and manual handpiece for specific problem areas.

Q Are the treatments painful?

A No. You feel the comfortable stimulation of your muscles.

Q How many treatments are needed for good results?

A A series of 2 treatments per week for 6 to 8 weeks are recommended. However, you will begin to see and feel a difference after your first treatment.

Q How long do the treatments usually last?

A Just like keeping the rest of your body in shape, you will need to have at least a monthly treatment to maintain your results.

Q What results can I expect?

A In addition to lifting facial and neck muscles the Contour Ultra will:

- Improve blood and lymph microcirculation
- Tighten Pores
- Provide an instant glow
- Improves muscle tone in the face & neck
- Improve skin quality
- Visibly reduce wrinkles
- Firm the skin
- Activate cellular renewal
- Eliminate toxins

20 Minute Automatic Facial Exercise

Q Why has my face and neck begun to sag and droop?

A There are 2 primary components of aging:

1. The **sun** causes photo damage and makes your skin age.
2. **Gravity** from the time you were born is “tugging” and pulls your muscles downward toward mother earth. As gravity pulls on your muscles they lengthen, lose tone, firmness, and thickness and reveal your age.

It is important to note, that no matter how much money and effort you apply to keeping your skin youthful and beautiful you are doing nothing to reverse the effects of gravity on your face and neck muscles. You will have beautiful skin on sagging muscles and still show your age!

Q Will I get any buildup of Lactic Acid in my muscles?

A No. The Contour Ultra stimulates each muscle for a period of time and then lets the muscle rest, so that no natural toxins are allowed to build up.
